TRUE ADVENTURE NEVER ENDS

All-Day Aerodynamics

We've sculpted the new upper fairing to channel airflow around the upper body, reducing fatigue on longer journeys. The screen height adjusts through 5 stages for flexible wind protection.

19-inch Front Wheel

The new, smaller diameter wheel plus wider 110/80-19 tyre offer increased front-end grip and feel, alongside improved manoeuvrability at all speeds.

6-Axis IMU Control

The Inertial Measurement Unit (IMU) measures in real-time the exact riding conditions of the bike for precise management of HSTC, Wheelie Control and Cornering ABS, Cornering Lights and much more.

TFT Touch Screen Display

6.5-inch, full colour touch screen control of a range of features including riding modes, with Bluetooth as well as Apple CarPlay® and Android Auto® smartphone connectivity for navigation, calls and audio.

Refined Performance

Two up and loaded you need torque for effortless overtaking. The engine now has 7% more torque through the midrange, thanks to higher compression ratio and optimized intake and exhaust.

Advanced Riding Technology

Four default riding modes cover most situations, and you can go fully custom with 2 additional User modes. The DCT option also feature G-Switch, for more direct traction off-road.

- Please note that the figures provided are results obtained by Honda under standardised testing conditions prescribed by WMTC. Tests are conducted on a rolling road using a standard version of the vehicle with only one rider and no additional optional equipment. Actual fuel consumption may vary depending on how you ride, how you maintain your vehicle, weather, road conditions, tyre pressure, installation of accessories, cargo, rider and passenger weight, and other factors.
- These models come with a 2 year or 20,000km manufacturing warranty (whichever comes first).
