THE POWER TO GO FURTHER

NS5250

Big Bike Style

The NSS250 has always been a sharp dresser. It's just got even sharper – the front fairing takes cues from the impressive Forza 750 and injects a big bike edge and feel in compact, mid-capacity form.

Tech-Packed 5-Inch TFT Display

The redesigned instrument panel now features a 5-inch TFT meter, can access many of your device's features, including phone calls, music, and navigation, via Honda RoadSync integration.

Electronic Adjustable Windscreen

The electronically operated windscreen adjusts through 180mm as you ride. The height can be altered by simply pushing the button – up or down – on the left handlebar.

NSS250

LED Lighting

The bright LED headlights and taillight lead the NSS250's chiselled look. But they're not just about style; they ensure a big presence on the road day or night, improving visibility to other road users.

Power and Torque to Rely On

The SOHC, 4V fuel-injected engine delivers strong torque and power for excellent all-round performance – just right for dealing with the highway with enhanced Smart Power+ (eSP+) low friction technologies throughout.

Smart Key Convenience

Smart Key operation of the ignition ensures total ease – just put it in your pocket and ride. If you are within proximity of your scooter, you can open the seat to get to the storage space.
